TOWEL RAILS

EXCEED  
*expectations*

Radiant Australia have been at the forefront of providing quality heated towel rails and quality design for more than a decade. Our products were once considered something of a luxury item, and have now become a standard inclusion in modern bathroom designs. Our heated towel rails are easy to install and are available in a number of different sizes and finishes to suit any bathroom style or colour. You do not have to compromise with Radiant - we have a strong focus on quality, backed by first class customer service, whilst retaining a competitive position in the market.

## EXCELLENCE AT A GLANCE

---

Mirror Polished and Satin Brushed manufactured from 304 grade stainless steel

---

---

Coloured Coatings are covered by a 2 year warranty

---

# BE INSPIRED *options*

Our full collection can be integrated to achieve a designer look for any bathroom, creating a true highlight within a home and backed by our ten year warranty. With an array of finishes; from our timeless polished stainless steel, which are the perfect match to any chrome bathroom fittings, ever popular Matt Black, to our newly added Gun Metal Grey, Oil Rubbed Bronze and Brushed Gold. All towel rails have been Australian Safety Approved and can be either plugged in or hard wired creating no visible wiring. Power outlets can be requested in either a left or right configuration and can be inverted so that the cable can exit from the top if required, giving you an array of bathroom options.

SINGLE HEATED & NON-HEATED

TOUCH SCREEN  
*timer*

A Digital Timer Switch is an ideal solution for automatically controlling your heated towel rail. No longer will you forget to turn it on, or leave the rail on all day because you can simply program the timer to turn your towel rail on before you get up and turn it off a few hours later when the wet towels have dried.

- 16 Amp rating (suitable for all heated towel rails)
- Blue backlit display which illuminates for easy programming
- Manual or program mode
- Timing: 2 on and 2 off times per day
- 5/2 or 7 day timing mode
- Keypad lock function
- 120mm x 80mm x 18mm (fits into a standard wall box/bracket)
- 2 year warranty

# FREESTANDING *specifications*

## STR06

Square bar / Height 750mm  
 7 evenly spaced bars / 125 Watts  
 Vertical bars 30mm x 30mm  
 Horizontal bars 19mm x 19mm  
 110mm from wall  
 Cable length 1.4m

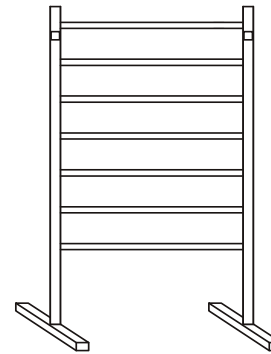

CODE	Size (mm)	Finish
STR06LEFT	950x750	Polished
STR06RIGHT	950x750	Polished

## STR430

Square bar / Height 1100mm  
 10 evenly spaced bars / 80 Watts  
 Vertical bars 30mm x 30mm  
 Horizontal bars 19mm x 19mm  
 110mm from wall  
 Cable length 1.4m

CODE	Size (mm)	Finish

BSTR430LEFT	430x1000	Matt Black
BSTR430RIGHT	430x1000	Matt Black

## FSTR01

Freestanding / Height 1000mm  
 7 evenly spaced bars / 90 Watts  
 Vertical bars 38mm x 24mm  
 Horizontal bars 19mm diameter  
 Adjustable feet / Plug in on RIGHT side on/off switch  
 Cable length 1.4m  
 Feet length 360 mm

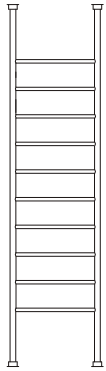

CODE	Size (mm)	Finish
FSTR01	600x1000	Polished

# FLOOR TO CEILING specifications

- Mirror Polished and Satin Brushed manufactured from 304 grade stainless steel
- Coloured finishes manufactured from 201 grade stainless steel
- Mirror Polished & Satin Brushed covered by a 10 year warranty
- Coloured finishes covered by a 2 year warranty

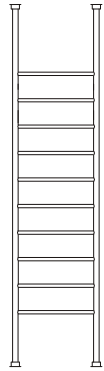

# TIMER specifications

## FC-2400

Round bar / Height 2400mm / 10 evenly spaced bars  
Vertical Bars 32mm diameter  
Horizontal Bars 19mm  
Available in various widths: 500 / 600 / 700  
Floor-Ceiling only available in Mirror Polished

CODE	Watt	Size (mm)	Finish
FC-2400X500	110W	500x2400	Polished
FC-2400X600	125W	600x2400	Polished
FC-2400X700	145W	700x2400	Polished

## FC-2500

Round bar / Height 2500mm / 10 evenly spaced bars  
Vertical Bars 32mm diameter  
Horizontal Bars 19mm  
Available in various widths: 500 / 600 / 700  
Floor-Ceiling only available in Mirror Polished

CODE	Watt	Size (mm)	Finish
FC-2500X500	110W	500x2500	Polished
FC-2500X600	130W	600x2500	Polished
FC-2500X700	145W	700x2500	Polished

## FC-2700

Round bar / Height 2700mm / 10 evenly spaced bars  
Vertical Bars 32mm diameter  
Horizontal Bars 19mm  
Available in various widths: 500 / 600 / 700  
Floor-Ceiling only available in Mirror Polished

CODE	Watt	Size (mm)	Finish
FC-2700X500	110W	500x2700	Polished
FC-2700X600	125W	600x2700	Polished
FC-2700X700	145W	700x2700	Polished

## Touch Screen Timers

16 Amp rating (suitable for all heated towel rails)  
Manual or program mode  
120mm x 80mm x 18mm (fits into a standard wall box/ bracket)  
2 year warranty  
Please see the full specifications at the front of the brochure

### STANDARD DIGITAL TOUCH SCREEN TIMERS

TS8100W-TIM-V Vertical Mounted - White  
TS8100W-TIM-H Horizontal Mounted - White

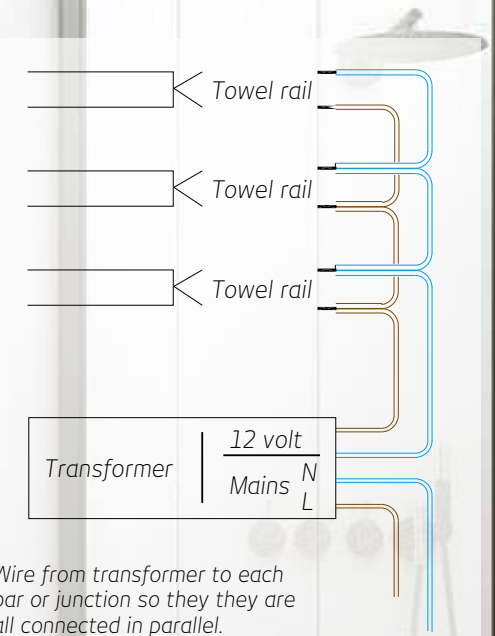

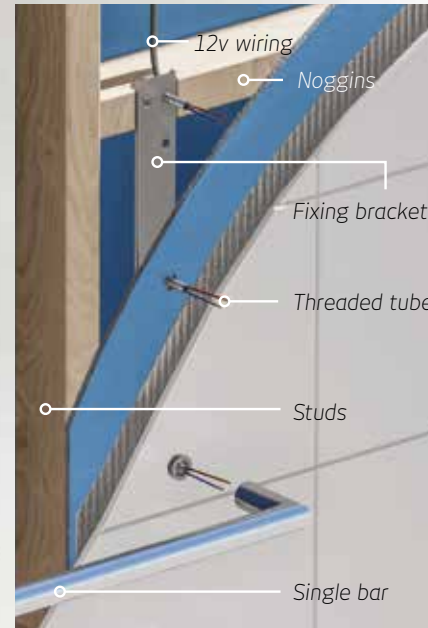

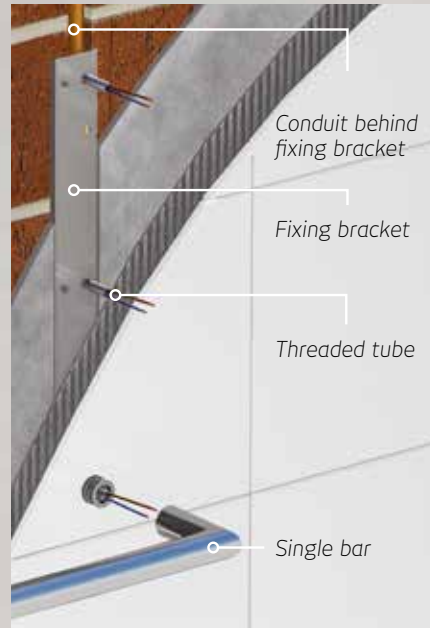

### RADIANT DIGITAL GLASS FRONTED TOUCH SCREEN TIMERS

GTSW-TIM-V Vertical Mounted - White  
GTSB-TIM-V Vertical Mounted - Black  
GTSS-TIM-V Vertical Mounted - Silver

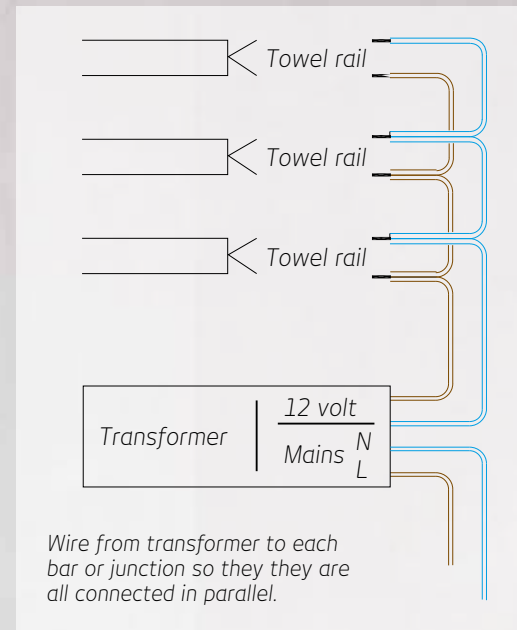

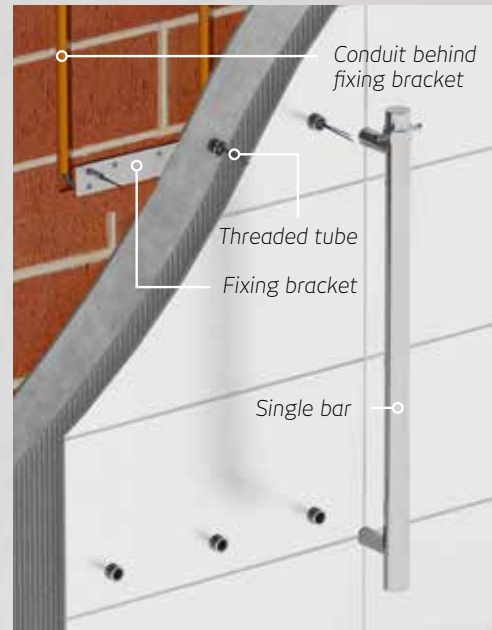

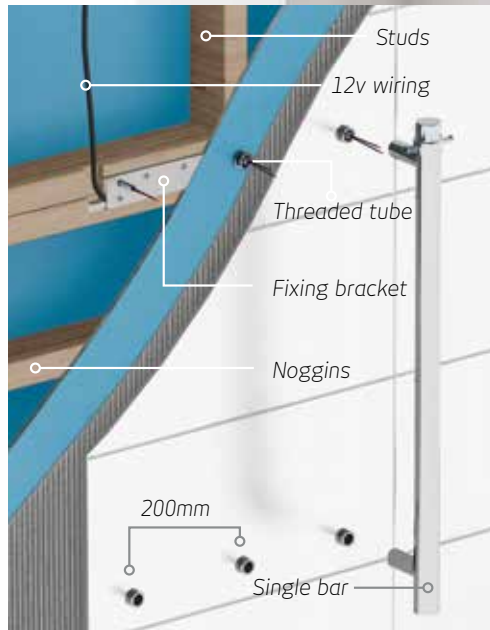

# SINGLE TOWEL RAIL *installation*

Metal fixing bracket for simple pre-wiring of Radiant single bar towel rails. If installing on a brick wall, first install a suitable conduit from the ceiling to the position of the lowest towel rail. Ensure that the wiring holes in the bracket are positioned directly over the conduit. Mark the desired spacing and pre-drill holes in the conduit prior to fixing the bar in position on the wall. If installing on a timber or metal framed stud wall, a conduit is not essential. The transformer should be located as close to the top of the conduit as possible

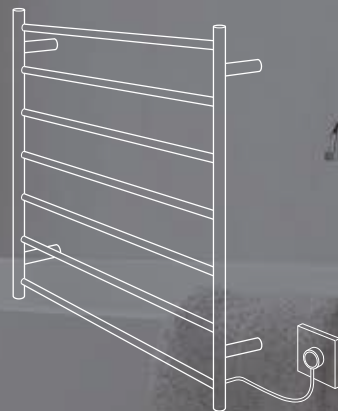

NOTE: Use a spirit level or laser to ensure the bar is perfectly vertical when installed. Please visit [radiantaustralia.com.au](http://radiantaustralia.com.au) for a complete downloadable installation guide.

# SINGLE VERTICAL TOWEL RAIL *installation*

## LADDER WIRING *options*

PLUG IN

HARD WIRED CONCEALED CABLE

- Wall switch or timer.
- A concealed cable (1.4m) in wall or conduit to separate switch!
- Cable connection available left OR right side - please specify requirement when ordering.
- 35mm
- Fifth leg concealment tube

The RTR and STR series heated towel rails are supplied with a moulded plug for 'soft wiring' AND a concealed fixing kit for 'hard wiring'. Please see drawings.

For concealed wiring, a provision needs to be made to connect the towel rail via a switch or timer switch as per the drawing. Depending on your preferred switch position the towel rail can be mounted upside down if required.

NOTE: Hard wired installation must be carried out by a licenced electrician. The Radiant Towel Rail range are manufactured in accordance with Australian Standards - SAA Certificate of Approval number V07911. All rails are covered with a 10 year warranty for construction / heating element and the coating on coloured rails is covered by a 2 year warranty.

Please visit [radiantaustralia.com.au](http://radiantaustralia.com.au) for a complete downloadable installation guide.

# your FAQ'S

## **How hot do the towel rails get?**

The temperature of our heated towel rails can vary depending on bathroom temperature and if they are operated with or without a towel. A folded towel will generally hold the heat and therefore the bars will be warmer than when operated without a towel. In general they should be hot enough to dry and warm the towels, but not too hot to cause any issues. As a guide they should get to around 50-60 degrees Celcius.

## **How long will delivery take?**

With local stock held in most states, deliver to metro stores should only take on average 1-3 business days, country stores may take a day or two longer depending on location and day/time of order.

## **How long is the cable?**

The cable on our standard range of 240V towel rails is approximately 1.4m long, but can be cut short or lengthened by the installing electrician. If purchasing a 12V towel rail, this will have a 3m cable.

## **Where can they be positioned in the bathroom?**

All Radiant Towel Rails are rated IP55, when hard wired, which is one of the highest ratings available for heated towel rails in Australia. This means the towel rail is protected against water jets from any direction. IP55 rating generally allows installation in very close proximity to the bath or shower when 'hard wired' (including above the bath) as long as they are wired to a switch which is positioned in 'Zone 3' as determined by the AUS wiring regulations. As bathroom designs vary greatly and as with any electrical appliance, please always

ask your builder to consult the current version of the AUS wiring regulations to confirm the exact position allowable.

## **What are the wiring options?**

Our towel rails can be plugged into a GPO/ Powerpoint, or hard wired to a standard switch or timer switch. They can also be wired back to the light/fan switch plate as long as they are connected to the power circuit.

## **Which side does the wire come from?**

Power outlets can be requested in either bottom left or right configurations. Please note that the wiring position is fixed and cannot be changed so it is important to order the correct side if the electrician has already done the 'pre-wiring' for the towel rail.

## **Can I get top wire outputs?**

The towel rails can be mounted upside down if the connection is preferable at the top and this in no way affects the warranty. I.e a bottom left can become a top right.

## **How do you hide the cable?**

All of our towel rails come with a standard moulded plug for 'soft wiring' and also a separate '5th leg' for concealment of the cable when 'hard wired'. This fifth leg attaches to the towel rail and sits flush against the wall (without fixing) making installation very straight forward. As the concealed fixing sits directly behind the vertical bar it is barely noticeable and therefore does not affect the aesthetic.

## **How high off the floor should they be mounted?**

This depends on the model chosen and the location. For example a smaller model such as an RTR03 would generally be mounted higher off the floor than a taller model such as an RTR04. However if mounted below a window,

it may be mounted lower than when the wall height is available.

## **What do I do if I am installing on a half tiled wall?**

The legs supplied with all ladder towel rails are 80mm in length. However 70mm or 90mm are available upon request.

## **How much do they cost to run?**

The wattages of our current range vary between 65W and 145W, so depending on the electricity tariff, they should cost on average between 1-3 cents per hour to operate.

## **Can you make custom sizes?**

Custom sizes are available for project orders of 50 units or more where a retailer wants to stock a specific custom size outside of our standard range. Please contact us for further information and pricing. Orders for 'one offs' are generally not viable due to the cost of set up and approvals.

## **Are the towel rails thermostatically controlled?**

No. Our towel rails have a fixed wattage which is not variable. Although the towel rails are designed to run continuously, if you wish to control the timing or heat output from the towel rail, it is possible to connect to our Standard Touch Screen Timer.

## **Do you wish to make a claim?**

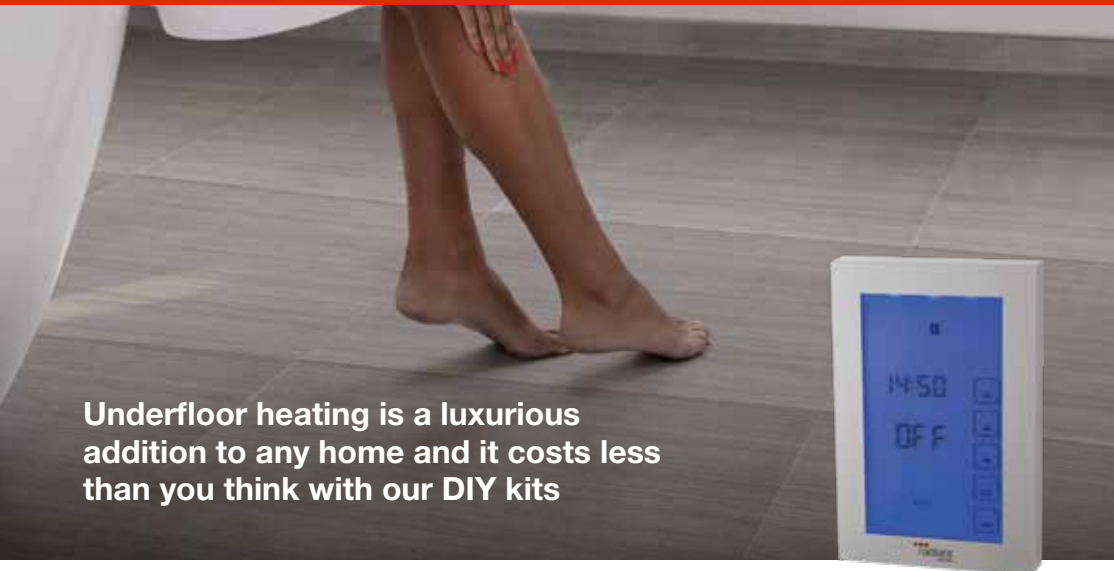

Please send all claim requests to [claims@radiantheating.com.au](mailto:claims@radiantheating.com.au)

When your claim has been approved we will issue you with an RMA number which you MUST quote when you return the item.

Please note that all returns (excluding faulty items) will be subject to a 15% restocking fee. Goods will need to be returned, packaged for re-sale, to one of the Radiant Australia warehouses before a credit will be issued.

# WE ALSO SELL THE FOLLOWING:

## DIY UNDERFLOOR HEATING

**Underfloor heating is a luxurious addition to any home and it costs less than you think with our DIY kits**

### Benefits

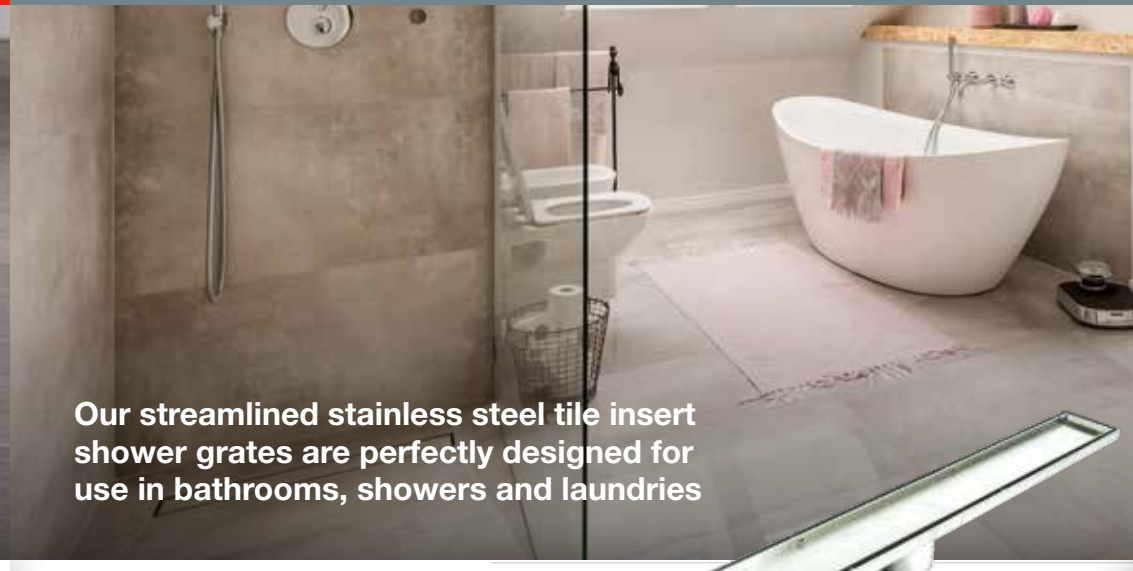

- On demand
- Asthma + allergy friendly
- Better bathroom design
- Dry floor
- Economical to run
- Temperature control
- Safe

Why not upgrade to a dual thermostat / timer if installing a heated towel rail along with underfloor heating?

Kits available for both In screed and Under tile to suit any project. Visit [radiantaustralia.com.au](http://radiantaustralia.com.au) for a full list of kit sizes and availability.

## TILE INSERT SHOWER GRATES

**Our streamlined stainless steel tile insert shower grates are perfectly designed for use in bathrooms, showers and laundries**

### Benefits

- 304 stainless steel
- Mirror polished to all exposed edges
- Wide range of sizes
- 7-year warranty
- Australian Watermark approved
- 12mm deep insert can accommodate up to 10mm tile + adhesive
- Available in both Mirror Polished and Matt Black finishes

Visit [radiantaustralia.com.au](http://radiantaustralia.com.au) for a full list of Shower Grate sizes and availability.

# THERMANICHE

Our prefabricated Thermaniches are great for storing items, and are useful in showers, bathrooms and wet rooms

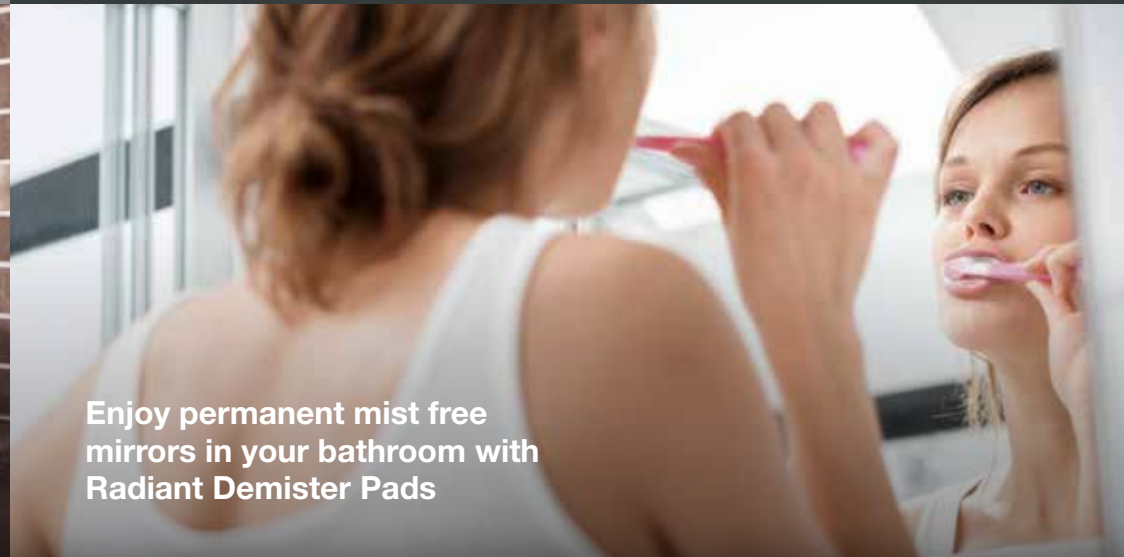

## Benefits

- Lightweight
- Tile ready surface
- Waterproof
- Range of sizes
- High compressive strength
- Eco friendly
- Render + plaster ready surface

For more information about the full range of Thermasheet products visit our dedicated website [thermasheet.com.au](http://thermasheet.com.au). Visit [radiantaustralia.com.au](http://radiantaustralia.com.au) for a full list of Thermaniche sizes and availability.

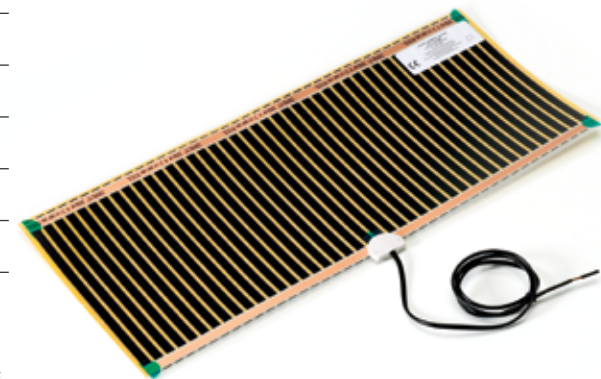

# MIRROR DEMISTERS

Enjoy permanent mist free mirrors in your bathroom with Radiant Demister Pads

## Benefits

- Developed and manufactured in the UK
- Simple to install and use
- Economical to run
- 10 year warranty
- Maintenance free
- IP44 rating
- Available in 5 stock sizes

Visit [radiantaustralia.com.au](http://radiantaustralia.com.au) for a full list of Mirror Demister sizes and availability.
